## PUBLICATION ETHICS

The International Journal of Indonesian Aquaculture Society, **Aquacultura Indonesiana** is committed to upholding the integrity of the scientific record. Therefore, it's important to agree upon the ethical standards of publication for all parties involved in the act of publishing which is the author, the journal editor, the peer reviewer and the publisher. The publishing ethics for this journal is based on those by the Committee on Publication Ethics (COPE). This journal follows the COPE guidelines on how to deal with potential acts of misconduct. Code of Conduct guidelines are available at [www.publicationethics.org](http://www.publicationethics.org). The essentials of Aquacultura Indonesiana publishing ethics for all parties involved in the act of publishing process are as follows:

### Ethical Responsibilities of Authors

- The submitted manuscripts must be original and free from any kind of plagiarism (*Important note: the journal use software to screen for plagiarism*)
- The submitted manuscripts has not been previously published (partly or in full), nor are being considered in other journals. If the articles is still under consideration, it may be rejected and returned to the author.
- Before submitting the manuscript, authors should check the instructions for Authors carefully. The author will be held responsible for false statements or failure to fulfill the above mention guidelines.
- Upon request, authors should be prepared to send relevant documentation or data in order to verify the validity of the results. This could be in the form of raw data, samples, records, etc. Sensitive information in the form of confidential or proprietary data is excluded.
- Authors whose names appear on the submission have contributed sufficiently to the scientific work and therefore share collective responsibility and accountability for the results. Change of authorship or in the order of authors are not accepted after acceptance of a manuscript.
- Highly recommended texts really have been well studied by co-authors before it is sent to the editor of the journal.
- No data have been fabricated or manipulated (including images) to support your conclusion.
- To ensure objectivity and transparency in research and to ensure that accepted principles of ethical and professional conduct have been followed, authors should include information regarding source of funding and potential conflict of interest must be clearly acknowledged.
- Proper acknowledgements to other work reported (individual/company/institution) must be given. Permission must be obtained from any content used form other source.
- For the English-language script writers are encouraged to ask for help to someone who is proficient in the preparation of the manuscript in English and master the style and good grammar.

## AUTHOR GUIDELINES

The manuscript was sent to be examined in advance by the Chief Editor includes material suitability and quality of the writing techniques. Manuscripts that do not conform with the field of study of the International Journal 'Aquacultura Indonesiana (AI)' or do not comply with the drafting of the journal will be returned to the author without further review. Scripts are in accordance with the provisions of the journal will be sent to the Aquacultura Indonesiana Partners (Peer Review) in accordance with their respective areas of expertise to substance evaluation. Reviewers are chosen are those who have the appropriate competence and is able to be objective. Reviewer name will be displayed or not at the discretion of the reviewer.

Brevity, clarity and suitability of writings on the provision of editorial, reviewer policy influence on the manuscript is reviewed. Highly recommended texts really have been well studied by co-authors before it is sent to the editor of the journal. For the English-language script writers are encouraged to ask for help to someone who is proficient in the preparation of the manuscript in English and master the style and good grammar. This shows that the assessment is also based on the scholarly manuscript and not merely technical matter of clarity. Keep in mind that the manuscript may be rejected simply because of how bad scriptwriting.

There are three types of editorial decisions to a script: 1). accepted with minor repairs, 2). accepted with major repairs, and 3). rejected. Most of the manuscript will be postponed until its minor shortcomings in terms of grammar and the way they are presented rectified author. In other words, the text editor that does not comply in terms of scholarship and writing standards will be returned to the author without being given the opportunity to resubmit. Most manuscripts were returned due to an error that is pretty basic. The author was asked to follow up on the comments and suggestions provided by the reviewers by improving the manuscript or respond by sending a justification for the manuscript that is considered wrong by the reviewer.

Editorial Board will provide additional review. It depends on the extent of improvements that need to be done. Template for journal AI, Please Download in link below:
